## **DETAILED ACTION**

### ***Allowable Subject Matter***

**Claims 1-22 are allowed in view of the prior art.**

The following is an examiner's statement of reasons for allowance:

As to claims 1, 8, and 17, the prior art of record, taken either alone or in combination, fails to disclose or render obvious an apparatus, article, and corresponding method comprising a sensor array that employs a parameter to induce a time-varying phase angle on an optical signal that comprises a phase generated carrier based on a single frequency, in combination with the rest of the limitations of the above claims.

As to the above claims, the prior art, such as US Pat. 6,154,308 and US Pat. 6,122,057 discloses a method and apparatus for calculating a time-varying phase angle using a plurality of samples. However, this prior art fails to disclose having the plurality of samples being based on a plurality of mixed signals output from a mixer component that employs an input signal based on the optical signal of the sensor array, in combination with the rest of the elements, method steps, and limitations of the above claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Lyons whose telephone number is 571-272-2420. The examiner can normally be reached on Monday through Friday.
